

Colour chips for decorative surface designing

Characteristics

HADALAN® ColourChips 89V are light-resistant, coloured decorative chips for making appealing ground coverings.

- Light-resistant
- Colour-fast
- Easy to process

Use

HADALAN® ColourChips 89V are used in conjunction with the respective HADALAN® coating product for creating decorative surface protection systems for both indoors and outdoors.

Areas of application:

- Balcony and terrace surfaces
- Floor surfaces, indoors
- Tiling
- Mineral substrates

Specifications

Packaging	Cardboard boxes
Barrel	1 kg
Colour tones	Mix grey-white White light grey dark grey black cream brick-red pigeon blue tobacco Bicolor grey Bicolor anthracite Bicolor cappuccino Bicolor vanilla
Grain size	2 - 8 mm
Storage	dry, 24 months

Quantity required

Depending on application	0.08 - 0.3 kg/m ²
Contrast scattering depending on desired layout	0.05 - 0.15 kg/m ²
whole-area scattering	0.25 - 0.3 kg/m ²

Preparation of the surface

The substrate must have load bearing capacity, be dry on the surface and free of dirt, dust, cleaning agent residues or other separating substances.

In case of significant temperature changes, in conjunction with increased atmospheric humidity, there is a danger of condensate water formation on the surface of the substrate. Before starting the coating work, this water film should have dried completely.

Application

1. **HADALAN® ColourChips 89V** are scattered in a previously applied adhesive layer while still wet.
2. The scattering for interspersing can be done by hand, or with a scattering cup or a Chiron blower.
3. After complete hardening, a transparent final sealing is required.
4. Further details can be obtained from the respective technical codes of practice or the processing instructions "Renovating, coating and decorative design with HADALAN® PUR liquid plastics.
